Boson NetSim

File Edit View Lab Designer Compiler Help

andrew.messier@boson.com

Home Community Lab Instructions

enable	enters privileged EXEC mode
end	ends and exits configuration mode
hostname host-name	sets the device name
show running-config	displays the active configuration file

Lab Tasks

Task 1: Connect to a Switch

Become familiar with the command-line interface (CLI), user EXEC mode, and privileged EXEC mode. Perform the following steps on Switch1.

- When the lab has finished loading, select **Switch1** from the **Devices** drop-down menu or from the NetMap. Press the Enter key to connect to the switch.
- Notice that, by default, the Cisco Catalyst 2950 switch has a host name of **Switch** at the user EXEC prompt (>). Type a question mark (?) to display a list of commands that can be issued from user EXEC mode.
- Like on routers, you can enter privileged EXEC mode by issuing the **enable** command. Enter privileged EXEC mode.
- Display the commands that can be issued in privileged EXEC mode.

Router1 X

```

Router>
Router>en
Router>conf t
Router (config)#host Router1
Router1 (config)#
Router1 (config)#
  
```
